Notice of consolidation of the Technology Department

The decision to consolidate the Technology Department was made at a Director’s meeting held today. This consolidation is to optimize the efficiency of Nifco’s Technology Development activities. Details follow below:

1. Current structure
Currently the domestic Technology Department plans and develops products through the Technology Development Centre, domestic plants and other business departments. However, Nifco Inc. realizes more than ever that there is a need to advance the efficiency of our product proposal and development activities due to new globally diversifying market needs.

2. New structure
In order to solve the issue in (1) above, the technology department will be consolidated across 2 locations in east and west Japan, (Kanagawa Prefecture, Yokosuka City & Aichi Prefecture, Toyota City.)
This is to enhance the efficiency with which we can develop products in response to our clients’ global needs.
Also in addition to the above, key technical staff will be in situ to directly handle matters quickly. This is to both bolster our technical support to our clients and to ensure that this support is continuous and uninterrupted.

3. Schedule
This consolidation is planned methodically from the end of 2014
